

Fremantle Futures

Metro Development Competition – FNA Futures

This initiative is a collaborative program between Fremantle NA, Perth NA, Southern Districts NA and Wanneroo Districts NA, established to provide continued development opportunities for athletes who were not successful in their selection for the Netball WA Fever In Time program. The competition is designed to ensure these athletes remain engaged in netball at an appropriate level while providing them with access to a more challenging and competitive environment than may be available through club netball alone. It aims to support the ongoing development of their technical skills, game awareness, confidence and overall performance, while providing an opportunity to further challenge and extend their capabilities.

Through this collaborative approach, the program seeks to create a positive pathway for athletes to continue progressing within the sport and position themselves for future representative and higher-level opportunities.

The MDC Committee invites all metropolitan associations to participate.
